2- " Mechatronics" الميكاترونكس

Mechatronics is a branch of engineering which involves the idea of Mechanical and electronic into a whole . it is the integration of Mechanical , electronic , and software engineering into Production so that the product involves a mechanical structure containing actuators to make things move and sensors to allow the microprocessor to monitor the state . Mechatronic systems exist in almost every science , mechanical or industrial fields . It is a dynamic field . Mechatronic devices have advantages over their older counterparts .They can be self- adjusting . For instance , mechatronic washing machines can sense the amount of dirt in the washing load , microwave ovens , dishwashers , etc.

الميكاترونكس هو فرع من الهندسة التي تنطوي على فكرة الميكانيكية والإلكترونية ككل. إنه تكامل الميكانيكية والإلكترونية وهندسة البرمجيات في الإنتاج بذلك أن المنتج يتضمن بنية ميكانيكية تحتوي على مشغلات لجعل الأشياء تتحرك وأجهزة الاستشعار للسماح للمعالج الدقيق لرصد الحالة. توجد أنظمة الميكاترونك في تقريبا كل المجالات العلمية أو الصناعية. إنها ديناميكية حق. تتمتع أجهزة الميكاترونك بمزايا تفوق عمرها نظرائه. يمكن أن تكون ذاتية الضبط. على سبيل المثال، الميكاترونك يمكن للغسالات استشعار كمية الأوساخ في حمل الغسيل، أفران الميكروويف وغسالات الصحون، إلخ

Reading Comprehension & Textbook (20 Marks)

Q.1 A . Read the following passage carefully.

Global warming is the rise in the average temperature in the earth's atmosphere and oceans in the late 19th century . It happens when greenhouse gases (carbon dioxide , water vapour , nitrous oxide , and methane) trap heat and light from the sun in the earth's atmosphere , which increase the temperature . This hurts many people , animals, and plants . Many cannot take the change , so they die . Global warming is affecting many parts of the world . It makes the sea rise . When the sea rises , the water covers many low land islands: many plants will die and thus the animals will lose a source of food and animal food .

“ Industrial Pollution ”

التلوث الصناعي

The main source of pollution is caused by industrial waste. Industrial pollution

Can impact air quality and it entre the soil causing environment problems and another forms of pollution such as water pollution is caused by dumping industrial waste into water ways . factory workers should reduce industrial waste .

السبب الرئيسي للتلوث هو النفايات الصناعية. التلوث الصناعي يمكن أن يؤثر على جودة الهواء ويدخل التربة ويسبب مشاكل بيئية وأشكالا أخرى من التلوث مثل تلوث المياه ناتجة عن إلقاء النفايات الصناعية في طرق المياه. يجب على عمال المصانع الحد من النفايات الصناعية.

“ Mining Techniques ”

تقنيات التعدين

Modern mining processes involve prospecting for are bodies , analysis of the profit potential of a proposed mine , extraction of the desired materials , and finally reclamation of the land to prepare it for other uses once the mine is closed .

تتضمن عمليات التعدين الحديثة التنقيب عن الأجسام ، وتحليل إمكانات الربح للمنجم المقترح ، واستخراج المواد المطلوبة ، وأخيرًا استصلاح الأرض لإعدادها للاستخدامات الأخرى بمجرد إغلاق المنجم.

Reading Comprehension & Textbook (20 Marks)

There are a number of forms of Industrial pollution . One of the most common is water pollution . It is caused by dumping of industrial waste into waterways , or improper containment of waste , which causes leakage into groundwater and waterways . Industrial pollution can also impact air quality , and it can enter the soil , causing widespread environmental problems . Because of the nature of the environment , industrial pollution is never limited to Industrial nations . Samples of ice cores from Antarctica and Arctic both show high levels of industrial pollutions, illustrating the immense distances which pollutants can travel .

Now answer or compete (**FOUR**) of the following . (8 M .)

- 1- What is one of the most common forms of industrial pollution ?
- 2- Can industrial pollution also impact air quality ?
- 3- Why is industrial pollution never limited to industrial nations ?
- 4- Samples of..... from Antarctica and Arctic both show high levels of industrial pollutions .
- 5- Give the passage a suitable title .

B. Answer (**TWO**) of the following questions : (Textbook) (6 M .)

- 1- What is your favourite breakfast ?
- 2- How often do you use the internet ?
- 3- What does maintenance mean ?

C . State whether (**TWO**) of the following statements are True or False . (6 M .)

- 1- We can preserve food for a long time .
- 2- Materials recovered by mining include only coal .
- 3- Factory workers should reduce industrial waste .

Reading Comprehension & Textbook (20 Marks)

The nature of mining processes creates a possible negative influence on the environment both during the mining operations and for years after the mine is closed . The influence has led to most of the world's nations adopting regulations to moderate the negative effects of mining operations . Safety has long been a concern as well , though modern practices have improved safety in mines notably . Working in a coal mine could be a very dangerous job . Accidents happen every day , some of which were not recorded because they were so common . Frequent accidents were due to roofs collapsing in the mine workings or explosions from dangerous gases underground .

Now answer or compete (FOUR) of the following . (8 M .)

“ The Advances of Mechatronics in Life ”

تقدم الميكاترونكس في الحياة

Mechatronics is a branch of engineering which involves the idea of Mechanical and electronic into a whole . it is the integration of Mechanical , electronic , and software engineering into Production so that the product involves a mechanical structure containing actuators to make things move and sensors to allow the microprocessor to monitor the state . Mechatronic systems exist in microprocessor to monitor the state . Mechatronic systems exist in almost every science , mechanical or industrial fields . It is a dynamic field . Mechatronic devices have advantages over their older counterparts . They can be self- adjusting . For instance , mechatronic washing machines can sense the amount of dirt in the washing load , microwave ovens , dishwashers , etc.

الميكاترونكس هو فرع من الهندسة التي تتطوي على فكرة الميكانيكية والإلكترونية ككل. إنه تكامل الميكانيكية والإلكترونية وهندسة البرمجيات في الإنتاج بذلك أن المنتج يتضمن بنية ميكانيكية تحتوي على مشغلات مشغلات لجعل الأشياء تتحرك وأجهزة الاستشعار للسماح لل معالج الدقيق لرصد الحالة. توجد أنظمة الميكاترونك في تقريبا كل المجالات العلمية أو الصناعية. إنها ديناميكية حقل . تتمتع أجهزة الميكاترونك بمزايا تفوق عمرها نظرائه . يمكن أن تكون ذاتية الضبط. على سبيل المثال ، الميكاترونك يمكن للغسالات استشعار كمية الأوساخ في حمل الغسيل ، أفران الميكروويف وغسالات الصحون ، إلخ

" The Advances of Mechatronics in Life "

تقدم الميكاترونكس في الحياة

Mechatronics is a branch of engineering which involves the idea of Mechanical and Electronic Mechanical and electronic into a whole . it is the integration of Mechanical and software into Production so that the product involves a mechanical structure containing actuators to make things move and sensors to allow the microprocessor to monitor the state . Mechatronic systems exist in almost every science , mechanical or industrial fields . It is a dynamic field . Mechatronic devices have advantages over their older counterparts . They can be self-adjusting . For instance , mechatronic washing machines can sense the amount of dirt in the washing load , microwave ovens , dishwashers , etc.

الميكاترونكس هو فرع من الهندسة التي تتطوي على فكرة الميكانيكية والإلكترونية ككل. إنه تكامل الميكانيكية والإلكترونية وهندسة البرمجيات في الإنتاج بذلك أن المنتج يتضمن بنية ميكانيكية تحتوي على مشغلات لجعل الأشياء تتحرك وأجهزة الاستشعار للسماح للمعالج الدقيق لرصد الحالة. توجد أنظمة الميكاترونك في تقريبا كل المجالات العلمية أو الصناعية. إنها ديناميكية حقل . تتمتع أجهزة الميكاترونك بمزايا تفوق عمرها نظرائه . يمكن أن تكون ذاتية الضبط. على سبيل المثال ، الميكاترونك يمكن للغسالات استشعار كمية الأوساخ في حمل الغسيل ، أفران الميكروويف وغسالات الصحون ، إلخ .

Reading Comprehension & Textbook (20 Marks)

A . Read the following passage carefully.

Maintenance may be defined as : actions which retain or restore an item in or to a state in which it can perform its required function . There are two types of maintenance in use : Preventive maintenance , where equipment is maintained before break down occurs. This type of maintenance has many different variations and is subject of various researches to determine the best and most efficient way to maintain equipment . It is effective in preventing age related failures of the equipment . The second type is the Corrective maintenance, Where equipment is maintained after break down . This maintenance is often more expensive because worn equipment can damage other parts and cause multiple damage.

Now answer or compete (FOUR) of the following . (8 M .)

- 1- How many types of maintenance are there ?

2- **" Mining Techniques "**

تقنيات التعدين

Mining means obtaining or extracting substance from the earth . There are many methods of mining ,dependent on where and how Mineral deposit is found . Some mined substances can be found at or near the earth's surface , So they are cheap . Any material that cannot be grown through agricultural processes , or created arterially in a laboratory or factory, is usually mined .

Mining in a wider sense is the extraction of any non- renewable resource . In addition to the above mentioned , we should know some steps . First , modern mining processes involve prospecting for ore bodies , then analysis of the analysis of the profit potential of a proposed mine , after that extraction of the desired materials and finally reclamation of the land to prepare it for other uses once the mine is closed .

التعدين يعني الحصول على أو استخراج المواد من الأرض. هناك العديد من طرق التعدين ، تعتمد على مكان وكيفية إيداع المعادن وجد . يمكن العثور على بعض المواد الملعومة في الأرض أو بالقرب منها لذا فهي رخيصة الثمن. أي مادة لا يمكن زراعتها من خلال العمليات الزراعية ، أو التي تم إنشاؤها في الشرايين في المختبر أو المصنع ، عادة ما يتم تعدينه. التعدين بمعناه الأوسع هو استخراج أي طاقة غير متجددة . بالإضافة

إلى ما سبق ، يجب علينا تعرف بعض الخطوات. أولاً ، تتضمن عمليات التعدين الحديثة التنقيب للهيئات الخام ، ثم تحليل تحليل إمكانات الربح منجم مقترح ، بعد ذلك يتم استخراج المواد المطلوبة وأخيرًا استصلاح الأرض لإعدادها للاستخدامات الأخرى بمجرد أن يصبح المنجم مغلق .

Reading Comprehension & Textbook (20 Marks)

A . Read the following passage carefully.

Engineering is the use of scientific principles to design and build machines, structures, and other items, including bridges, tunnels, roads, vehicles, and buildings .The term engineering is derived from the word engineer, which itself dates back to the 14th century when an engineer referred to a constructor of military engines. Engineering is a broad discipline that is often broken down into several sub-disciplines. Engineering is often characterized as having four main branches: chemical engineering, civil engineering, electrical engineering, and mechanical engineering . Engineers need proficient knowledge of relevant sciences for their design projects . As a result, many engineers continue to learn new material throughout their career. The engineering profession engages in a wide range of activities, from large collaboration at the societal level, and also smaller individual projects. Almost all engineering projects are obligated to some sort of financing agency . Engineering has a direct and vital impact on the quality of life for all people.

Now answer or compete (FOUR) of the following . (8 M .)

- 1- What is engineering ?
- 2- What did engineer refer to in 14th century ?
- 3- Does engineering have a direct and vital impact on the quality of life for all people?
- 4- What are the four main branches of engineering ?
- 5- Why do many engineers learn new materials throughout their career ?

B. Answer (FOUR) of the following questions : (Textbook)

(8 M .)

- 1- Why do manufacturers use a vacuum seal ?
- 2- What is mining ?
- 3- What do actuators do ?
- 4- Which products are better ; mechatronic products or their counterparts ?
- 5- Can we preserve food for a long time ?

C . State whether (TWO) of the following statements are True or False . (4 M .)

- 1- Mining in a wider sense comprises extraction of any renewable resource .
- 2- Mechatronics is a dynamic field .
- 3- Global environment is affected by factory waste .

“ The Advances of Mechatronics in Life ”

تقدم الميكاترونكس في الحياة

Mechatronics is a branch of engineering which involves the idea of Mechanical And electronic into a whole . it is the integration of Mechanical , electronic , and software engineering into Production so that the product involves a mechanical structure containing actuators actuators to make things move and sensors to allow the microprocessor to monitor the state . Mechatronic systems exist in microprocessor to monitor the state . Mechatronic systems exist in almost every science ,mechanical or industrial fields . It is a dynamic field . Mechatronic devices have advantages over their older counterparts . They can be self-adjusting . For instance , mechatronic washing machines can sense the amount of dirt in the washing load , microwave ovens , dishwashers , etc.

الميكاترونكس هو فرع من الهندسة التي تنطوي على فكرة الميكانيكية والإلكترونية وكل. إنه تكامل الميكانيكية والإلكترونية وهندسة البرمجيات في الإنتاج بذلك أن المنتج يتضمن بنية ميكانيكية تحتوي على مشغلات لجعل الأشياء تتحرك وأجهزة الاستشعار للسماح لل معالج الدقيق لرصد الحالة. توجد أنظمة الميكاترونك في تقريبا كل المجالات العلمية أو الميكانيكية أو الصناعية. إنها ديناميكية حق. تتمتع أجهزة الميكاترونك بمزايا تفوق عمرها نظرائه . يمكن أن تكون ذاتية الضبط. على سبيل المثال ، الميكاترونك يمكن للغسالات استشعار كمية الأوساخ في حمل الغسيل ، أفران الميكروويف وغسالات الصحون ، إلخ

“ Jam Making at Home ”

صنع المربى في المنزل

People usually use kinds of fruits like apples , fligs , apricots , oranges peaches , plums and water melon for jam making at home . We should cut the fruits into smaller parts .Before boiling the fruit , We add some lemon juice of citric acid , some sugar and water .After Boiling the fruit , we should immediately put it in jars then leave it to Cool after that seal it to prevent air from getting back into the jam .

الناس عادة يستعملون الفواكه مثل التين ، البرتقال ، التفاح أو الرقي لعمل المربى ، يجب أن نقطع الفواكه الى أجزاء أصغر . ونضيف السكر والماء الى الفاكهة قبل غليها . بعد غلي الفواكه ، يجب أن نضعها حالا في حاويات لئلا تمنع الهواء من العودة الى الحاوية .

Reading Comprehension & Textbook (20 Marks)

Q.1/A- Read the following passage carefully:

Food preservation includes several techniques and methods help in maintenance the quality and extending the life period of the food. Canning, drying (dehydration), freezing and gas packaging are the main methods of food preservation. Canning involves sealing food in airtight containers after heating to destroy microorganisms. Drying is removing moisture from food by various ways such as air drying, sun drying, or by dehydrators, it is commonly used to dry fruits, vegetables, meat, and herbs. Freezing means slow down microbial activity by lowering the temperature around -18°C (0°F) or lower. Freezing helps preserve the nutritional value, texture and flavor of food. The gas packaging method includes replacing the air surrounding the food product with a protective gas, usually nitrogen or carbon dioxide, it is used for packing salads, fresh meat and certain snack food.

Reading Comprehension & Textbook (20 Marks)

Q.1/A-Read the following passage carefully:

A clean environment is essential for a healthy life. Pollution harms the air, water and land, making it difficult for people and animals to live safely. Each person has a role in protecting the environment and reducing pollution. One of the best ways to keep the environment clean is by reducing waste. Instead of throwing away plastic bottles and bags, people can recycle them. Recycling helps reduce pollution by turning old materials into new products. Planting trees is another way to keep the environment clean, trees absorb carbon dioxide and produce oxygen, making the air fresher. People should also avoid littering and always throw trash in bins. Using public transportation, walking or riding bicycles instead of driving cars can also reduce air pollution.

Now answer **FOUR** of the following questions :

1. Why is a clean environment important?
2. How does recycling help reduce pollution?
3. Why is planting trees important for the environment?
4. Where should people throw trash?
5. Can using public transportation reduce air pollution?
